

BS Biochemistry, MBA, Head of Quality
(Chief Quality Officer)

Erik Respini

Erik Respini was appointed as the Chief Quality Officer of BioAtrium in April 2024.

Bringing with him a broad career in Quality Assurance within the pharmaceutical sector. His experience spans various geographies including Europe, Asia, and North America – and has accumulated expertise across a broad spectrum of technologies encompassing both development and commercial stages.

Before his tenure at BioAtrium, Erik held position of Global Head of QA Technical Development for Biologics & Cell and Gene Therapy (CGT) at Novartis. In this critical role, he was responsible for overseeing the quality assurance pertaining to technical development, manufacturing, as well as testing and release of clinical materials. Erik's journey at Novartis, extending over 16 years, started in Quality Control, eventually relocating to the US to spearhead the QA Operations department amidst a critical remediation phase. He then assumed the role of Production Manager at a facility in Singapore, followed by a promotion to Global Head of QC based in Switzerland. Erik then advanced to become the Site Head & Site Quality Head for an analytical testing site in Switzerland, where he also served as the FvP. His expertise further expanded into development as the Head of R&D Quality for Radioligand Therapies, covering both clinical and technical development facets.

Erik has Bachelor's degree in Biochemistry from Northeastern University in the US and a Master of Business Administration from Singapore Management University. A dual citizen of Italy and Norway, he is fluent in English, German, and Italian, and has a good command of Portuguese.
